

## **Cordys**

Cordys is a global provider of software for business process innovation. Global 2000 companies worldwide have selected Cordys to achieve performance improvements in their business operations, such as increased productivity, reduced time to market and faster response to ever-changing market demands. Headquartered in the Netherlands, Cordys has offices in the Americas, EMEA and Asia-Pacific.

## **Cordys R&D**

Cordys R&D is responsible for the development of the Business Operations Platform. At Cordys R&D, we bring together the most creative minds in software engineering, quality assurance, user interaction design and product management to develop state of the art software in a multicultural and multidisciplinary environment.

We are looking for

## **JavaScript Developers**

*Do you like the good bits of JavaScript?*

*Do you have a passion for developing advanced JS frameworks and user interfaces for world class products?*

*Do you love to invent and prototype new features and interactions?*

*Do you know how to deliver compelling functionality in performing code?*

## **Job Description**

You will be working in a team with talented developers and product managers who have a good understanding of customer requirements. You will be involved in all technical discussions, drive new innovative ideas of designing software systems, and make calls on what is feasible and what is not. You like to solve problems with elegant and practical code.

## **Position Summary**

Working in the NL head office at Putten, you will design and implement web applications. You will perform hands-on software development tasks such as feature development, bug fixing, unit testing and writing automated functional tests. You will engage with other developers, product managers, architects and QA engineers in a Scrum team. You will collaborate with Team leads and Architects to both promote great software design and drive innovation by coming up with new and surprising ideas for our products and processes. We will appreciate when you have the drive and ability to point out issues with the existing architecture and code, and clean it up.

## **Key Skills**

- Extensive hands-on experience in JavaScript
- Strong software design and object-oriented coding skills
- Experience in developing Ajax-based web apps
- Passion for usability, efficiency, maintainability and performance
- Experience with jQuery
- Experience in standards-compliant efficient CSS and HTML
- Experience with agile software development methodologies like XP and SCRUM
- Interest and drive to learn more about our platform, languages, frameworks
