

Software Architect

Cordys Inc. is a software sales and services organization. Cordys. has an opening for a software architect to join the existing dynamic team. Duties include design and architecture of the integration of the Cordys Business Collaboration Platform with customers' existing business systems, including preparing architectural diagrams and design documents; development of software solutions using standard Cordys tools and processes, including the Cordys Business Collaboration Platform Suite, and other integration technologies. Requires a bachelors, or foreign equivalent, in computer science, management information systems, or business administration, plus experience as a Software Architect, Software Engineer, or Software Developer. Must have experience (1) developing application connectors; (2) performing design and implementation of MDA, SOA, and Rule Oriented Application projects; and (3) designing BPM models, and development of forms, scripts, and dashboards. May telecommute. Some travel required.

Send resume to Cordys Inc, Human Resources, 1676 Viewpond Street, Suite #A4, Kentwood, Michigan 49508 or to jobs@cordys.com.
